

MyTAG[®]

Protecting People, Property & Assets through Trusted Technologies.

WELCOME TO MyTAG

MyTAG provides trusted proof of presence, security, compliance and tracking solutions to safeguard people, property and assets. The technology saves time and money, replacing outdated processes with a trusted and secure cloud based solution, which cannot be copied or cloned.

MyTAG's unique Patent Pending technology combines Near Field Communication (NFC), Geo-Positioning (GPS) and HID Trusted Tags to meet a multitude of client needs in sectors ranging from facilities management and security, to healthcare and education.

The flexible MyTAG platform allows additional services to be included as they are needed. Being cloud based and wireless means that it does not need to be hardwired or integrated with existing systems, making it simple and inexpensive to install and operate. The MyTAG dashboard provides real-time and historical management information from wherever you are and on any device, allowing a rapid response to any issues.

Trusted Proof of Presence

Provides trusted proof that a person was at a given location at specific times, allowing proof of servicing times, security patrols, visit periods and other time/location based events.

Trusted Proof of Compliance

Allows you to demonstrate that you have complied with all relevant legislation and regulations, ensuring that your building and its occupants are kept safe.

Key Management

Improves tracking and management of keys via an efficient, secure process, which saves time and money, and allows you to manage the retrieval of keys from your employees and contractors.

Trusted Proof of ID

Is a secure ID card system, incorporating HID Trusted NFC Tags and photo ID, which cannot be copied or cloned. It allows absolute verification of an individual's identity.

Asset Management

Improves the management of portable assets, such as heaters, radios and bicycles, by allowing you to track them within your building.

Lone Worker Safety

Helps ensure the safety of employees when they are working alone, using individual NFC tags that record and monitor their movements through the MyTAG 24/7 system.

TESTIMONIALS

“MyTAG’s solution has enhanced accuracy and efficiency across our key management, security guard patrol and contract management functions – all using a common platform.”

LEE MURRAY, BUILDING MANAGER, CITYPOINT LONDON

“MyTAG’s innovative cloud based technology allows us to prove the presence of our security officers on patrols, provide paperless key management, and manage portable assets such as bicycles and radios. Our processes are now more efficient and secure, saving time and providing a transparent service overview to our clients.”

PAUL HARVEY, COMMERCIAL DIRECTOR, ULTIMATE SECURITY

“When I saw the MyTAG Key Management and Lone Worker Solution I was excited by the simple solution to two of Estate Agent’s oldest issues. We now know where keys are and with whom, and lone worker tags make our team feel much safer when out and about. Well done, your vision and ingenuity deserves recognition.”

HOWARD LESTER, DIRECTOR, BALGORES LETTINGS
