

# MyTAG<sup>®</sup> | RAMS

## Keep your team safe with MyTAG's integrated RAMS and Training Academy

MyTAG RAMS is an intuitive, easy to use, cloud-based Health & Safety software that allows you to create and manage Risk Assessment and Method Statements (RAMS) digitally. It helps companies manage and mitigate the risks their employees and other people face, while ensuring that documentation is always available and up to date.

The integration between MyTAG RAMS and MyAcademy enables you to seamlessly manage risk assessments, method statements and employee training in one place. By keeping your team safe and compliant with the latest safety regulations, you can focus on the job at hand.

Ref	Risk Assessment and Method Statement	Category	Days Remaining (Expiry Date)
#1077	Internal Window Cleaning	Horizontal	364 days 12/02/2023
#1079	Internal Window Cleaning	Horizontal	26 days 05/01/2023
#1000	Daily Office Clean v3	Horizontal	17 days 14/01/2023
#1002	Internal Window Cleaning	Horizontal	3 days 28/01/2023
#1025	1st Feb Testing - Internal Window Cleaning	Horizontal	0 days 01/02/2023

"Having researched the marketplace for dedicated Risk Assessment and Method Statement software with some disappointment, we have worked with MyTAG to develop an incredibly user-friendly solution that addresses the complexity of RAMS processes. In my view, this product is at the forefront of the Risk Management market."

Paul Crilly, Managing Director NJC (Not Just Cleaning Ltd)

### ENSURE COMPLIANCE

Create site specific RAMS using customisable, easy-to-use templates, with automatic alerts when reviews are required. Integration with MyAcademy ensures that all required employee training is completed, with training records and other information accessible in minutes for auditing.

### IMPROVE COMMUNICATION

Bringing all your teams together on a single platform promotes collaboration across the business. RAMS can be sent electronically to appropriate employees, who can use digital signatures to demonstrate that they have read and understood the risks and how to reduce them. All RAMS can be downloaded into a PDF with company branding, and accreditation logos, so documents can be shared with customers. Standardised training courses ensure that all employees receive the same information and understanding, with the added benefit of being able to test the knowledge gained online.

### SAVE TIME

To create site specific RAMS, use the templates to save time, guide management on significant hazards to consider and customise the hazards, risks, control measures and procedures.

### BUILD YOUR REPUTATION

Professional RAMS and training help you to reinforce your Health & Safety performance. They enable you to stand out from your competitors, improve company image through compliance with legislation and also reduce risk to personnel and property. The MyAcademy e-learning solution, allows you to provide training for your team, to be completed at their convenience, with compliance certificates added to training records on completion. It notifies you of incomplete training and a full reporting suite analyses trends in training modules.
